

Project Design Phase
Problem – Solution Fit Template

Date	03 October 2026
Team ID	SWTID-2026-2035
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Problem - Solution Fit: ServiceNow Incident Form

1. CUSTOMER SEGMENTS Service desk agents, incident coordinators, and internal employees who raise or process incidents.	2. JOBS-TO-BE-DONE / PROBLEM Capture incident details consistently while keeping fields usable and enforcing required information.	3. AVAILABLE SOLUTIONS Standard ServiceNow Incident form plus configurable UI Policies and Client Scripts.
4. PROBLEM ROOT CAUSE Field behavior is not always context-aware; users may miss mandatory data or see irrelevant fields.	5. BEHAVIOUR Users enter or update incident fields based on category, priority, state, and other form conditions.	6. TRIGGERS Opening an Incident, changing a field value, changing state/priority, or submitting an incomplete form.
7. BEFORE / AFTER Before: inconsistent field behavior and validation. After: dynamic visibility/mandatory/read-only behavior with client-side validation.	8. OUR SOLUTION Configure Incident UI Policies for field behavior and Client Scripts for targeted client-side validation or field updates.	9. CHANNELS / RESOURCES ServiceNow developer instance, Incident form, configuration records, test cases, screenshots, and GitHub evidence.
