

User Acceptance Testing (UAT) Template

Date	03 October 2026
Team ID	SWTID-2026-2035
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Project Overview:

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: Implement and validate a ServiceNow Incident Client Script and UI Policy so that configured client-side field behavior is applied correctly on the Incident form.

Project Version: 1.0

Testing Period: 29 September 2026 to 01 October 2026

Testing Scope:

Features/Functionalities: Incident form Client Script execution; UI Policy conditions; field mandatory/read-only/visibility behavior; form validation.

Requirements: The Incident form shall apply the configured client-side logic and UI Policy when the specified conditions are met.

Testing Environment:

URL/Location: ServiceNow Developer Instance – Incident application/form

Credentials: Not included in the document; testing performed using the assigned ServiceNow developer instance.

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Client Script behavior on Incident form	1. Open an Incident form. 2. Enter/change the fields required to trigger the Client Script. 3. Observe the configured field behavior.	Configured client-side behavior is applied immediately when the trigger condition is met.	Passed – configured Client Script behavior was observed on the Incident form.	Pass
TC-002	UI Policy behavior on Incident form	1. Open an Incident form. 2. Change the condition/state used by the UI Policy. 3. Verify affected fields.	Configured field visibility, mandatory, or read-only behavior changes according to the UI Policy.	Passed – UI Policy applied the configured field behavior as expected.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No functional defect observed during UAT execution.	Execute TC-001 and TC-002 and verify configured Client Script/UI Policy behavior.	Low	Closed	No additional feedback; behavior matched the configured requirements.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
